

The table below utilises rainfall data collected on an hourly basis from rain gauges throughout the region to provide summary information for the calendar year. Last Month and Year To Date columns provide data up until the end of the preceding month.

The normal used for the Last Month and Year To Date percentage of normal are based upon the shorter of:

- the full period of record at the location, which must be longer than 5 calendar years to be considered a representative sample.
- the 30 years prior to the start of the last decade; this is considered a meteorological Normal.

Location Name	Most Recent Sample	Intensity (mm/hr)	Today (mm)	Yesterday (mm)	Last 5 days (mm)	This Month (mm)	Last Month (mm)	Last Month % of Normal	Year To Date (mm)	Year To Date % of Normal
